MEMORANDUM FOR: Executive Director-Comptroller

Bill :

The attached paper raises one of the issues which must be settled en route to sizing the over-all information sciences training program. I believe that for FY 73 we are obligated to take such students as other USIB member agencies desire to propose for the courses run by our people at the DIS facilities, limited of course by the numbers the staffing will permit. I shouldn't think, based on past experience while DIS was running the program that the student load would exceed program and faculty capabilities.

FY 74 and beyond poses a different problem. The program we proposed was not approved at the original level or any others we suggested. We are looking to identify Agency requirements but we need answers:

a. Should we contemplate any non-CIA students in FY 74? If not, do USIB agencies have to receive additional notification? Does PFIAB have to be informed of the changes - by special notice or in the Director's annual report?

b. At what level should we try to peg the Agency program for FY 74 and beyond - general education for familiarization only for a broad population, incorporated into existing other OTR courses or expanded technical applications training for actual and potential users. Should we react or go for business? The amount which was left in the FY 74 program will not accommodate expanded technical applications training. We have to work more on requirements but a posture indication from you would be helpful to that effort.

(g) Ltr frm Ex. Dir. -Compt., CIA, to DIA, dtd  
23 May 72

1. This memorandum reviews the sequence of circumstances leading to the establishment of the Information Science Center on 26 December 1967, and the subsequent termination of support by the Defense Intelligence Agency, for

Subject: Information Science Training for the  
Intelligence Community

the purpose of seeking clarification of its responsibilities, if any, of the Director of Training for providing information science training for non-CIA personnel of the Intelligence Community in the CIA managed courses planned for Fiscal Year 1973 and beyond.

2. Reference (a) stressed the need for improvement in the storage and retrieval of the intelligence product and recommended the training and retraining of personnel engaged in information-handling activities and in systems thinking and systems skills, suggesting that both senior administrative personnel and more junior operating people should acquire new abilities and attitudes to discharge the responsibilities associated with the enormous file and distribution system of the Intelligence Community. Reference (b) recommended a balanced program of university training, in-house data handling instruction and specialized courses at DIA applying information science technology to intelligence problems. Reference (c) requested DIA to develop specialized courses for personnel of the Intelligence Community. Reference (d) requested development of specialized courses by DIA, starting in FY 1969. Reference (e) established the Information Science Center at its Defense Intelligence School to develop information science courses in order to meet the requirements of the Intelligence Community. Reference (f) stated that it would be necessary to close the Information Science Center by 30 June 1972 due to Department of Defense budgetary cuts and reductions in other resources. It noted that DIA could arrange classroom space and faculty offices for a continuing program if other Intelligence Community members wished to provide funds or personnel. Reference (g) informed DIA that CIA desired to conduct under CIA management various information science courses at its Information Science Center in FY 1973 pending determination of longer-range requirements and a more permanent solution, thus accepting the DIA offer of facility support.

3. In the last 60 days negotiations have been completed with the Director, Defense Intelligence School for the scheduled use of their facilities in FY 1973 and the NSA has agreed to provide an instructor for the faculty. Program alternatives have been proposed and a reduced, but active information science program is to be undertaken in FY 1973. Guidance provided by the Executive Director-Controller suggests the desirability of bringing this program on CIA premises in FY 1974 with a greater emphasis on the needs for the training of CIA personnel.

Subject: Information Science Training for the  
Intelligence Community

4. In view of the interests of the President's Foreign Intelligence Advisory Board in information science training for the Intelligence Community and the subsequent initiative of the Director of Central Intelligence in the establishment of a community center for this purpose, the Office of Training would appreciate additional guidance on the extent of its responsibility for training the personnel of other USIB agencies and departments in the CIA managed programs to be conducted in Defense Intelligence School facilities in FY 1973 and on Agency premises in FY 1974.

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : Information Science Training

REFERENCE : Memo to ExDir from DD/S dtd 5 Jul 72

1. In response to your request for guidance, I believe the following should be accepted as the guideline:

a. CIA should plan to operate an information science training program for CIA personnel only. We are not required to conduct a community service, and there are certain very distinct benefits in having an in-house operation which can be focused more on our particular needs.

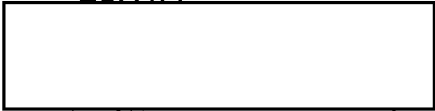

b. Since this is an individual CIA activity, I see no need to involve the PFIAB at this stage, since it was DIA which terminated the community effort. Further, the PFIAB requirement was levied in 1965, at a time when information science capabilities were considerably less than they are in 1972.

c. The basic thrust of our program should be to familiarize a rather broad spectrum of our analyst, administrative, and operating personnel with techniques of information science which can make a direct contribution to the performance of their duties. I would hope, for instance, that you would indeed incorporate some actual machine handling into some of your other courses. I do not believe you need to go in for the highly specialized technician-level training, as I suspect to the extent this is necessary we can exploit industry or academic training capabilities.

OFFICE OF THE DIRECTOR  
CENTRAL INTELLIGENCE AGENCY  
JUL 19 1972  
Approved

2. With respect to the amount of investment we should make in this effort (whether to react or go for business), I would appreciate your contacting potential customers for an estimate of their interest in use, following which we can better make some overall judgments as to the total investment needed.

MEMORANDUM FOR: Senior Training Officers

SUBJECT : Information Science Training Program  
for FY 1974

1. As the result of the recommendation in 1965 of the President's Foreign Intelligence Advisory Board (PFIAB), and a follow-up study by a USIB committee, the DCI requested the Department of Defense to develop and support a program of Information Science training for the benefit of all USIB agencies and departments. Thus, the Information Science Center (ISC) was established in 1967 at the facilities of the Defense Intelligence School (DIS). In 1970 CIA detailed two staff members to augment the faculty of the ISC. In early 1972 DIA announced that it would be necessary to withdraw their financial and personnel staffing support to this project because of heavy DOD budget cuts.

2. The Office of Training (OTR) has been tasked by the Executive Director-Comptroller and the Deputy Director for Support with the responsibility for salvaging sufficient ISC faculty, program and facility resources to permit a Information Science Training Program in FY 1973 and determining the Agency's longer range training requirements. Announcements of FY 1973 courses are being prepared and will be distributed this week. This program will contain a series of shortened and otherwise modified versions of recent ISC course offerings. Also, Information Science and Management Science subjects will be inserted in such key OTR programs as the Senior Seminar and the Midcareer, Intelligence Production, and Intelligence and World Affairs courses.

3. In FY 1974 we expect to improve and expand the inputs in OTR courses. Additionally, there may be a capability to provide separate courses in certain Information Science and Management Science subject areas. The courses under consideration are outlined in the Attachment. It is essential for planning purposes that we receive from your various offices their best estimates of participation in these programs.

SUBJECT: Information Science Training Program for FY 1974

4. Information Science may be defined as the body of knowledge and the methodology dealing with systematic and scientific solutions to intelligence and intelligence support tasks. It combines such approaches as Systems Analysis, Operations Research and Computer Operations, and such methods as Queuing, Network Analysis, Simulation, Linear Programming, Correlation and Regression Analysis, Statistics Modeling, and Probability. Management Science refers to the application of Information Science methods to the functions of planning, organizing, controlling and decision-making.

5. All instruction will be presented in intelligence and intelligence management contexts utilizing, if resources permit, a practical, "hands-on", computer terminal teaching approach. Course offerings will be designed for personnel at all levels who need to know the applications of Information Science to intelligence and intelligence support tasks, including the ability to interface effectively with specialists on information handling systems supporting, or otherwise affecting their responsibilities. As such these courses and course inputs are for the benefit of non-specialist systems users. They are not directed toward systems specialists.

6. If there are any questions with respect to the Attachment, please phone the Admissions, Information and Records Branch, OTR, Extension

7. We would appreciate your responses by 1 August 1972.

HUGH T. CUNNINGHAM  
Director of Training

ATTACHMENT

MEMORANDUM FOR: Director of Training

ATTENTION : Admissions, Information and Records Branch  
(OTR/ISS/AIR), Room 1036, Chamber of  
Commerce Building

FROM : \_\_\_\_\_ (Office Concerned)

Listed below are the best estimates of this office of student enrollments in FY 1974 for the courses described:

<u>Course</u>	<u>Number of Enrollments in FY 1974</u>
A. <u>Information Science for Intelligence (Functions Course)</u>	_____
<p>A six-week course for professional intelligence personnel teaching skills in the applications of Information Science to intelligence collection, production and support tasks. It includes Systems Analysis, Computer Applications, and Operations Research Techniques such as Storage and Retrieval, Linear Programming, Queuing, Bayesian Analysis, Value Analysis, Probability, etc. The course is presented in the context of the intelligence collection, production and support functions of the Agency. Practical, "hands-on" teaching techniques are utilized. Two years intelligence experience is desired but not essential. An engineering or mathematics background is unnecessary. (Grade range -- GS-09 through 14)</p>	

Number of Enrollments  
in FY 1974

Course

B. Management Science for Intelligence

A one-week course for middle and senior level managers emphasizing the applications of Information Science methods to management tasks. It teaches systematic and qualitative management methods. Course emphasis is on conveying to the student an appreciation of the capability, applicability and limitations of Management Science methods. The student is introduced to the use of computer terminal but skills are not developed. (Grade range -- GS-12 to 15. Special courses can be offered for grades GS-16, 17 and 18.)

C. Systems Analysis for Intelligence

A two-week course in Systems Analysis Techniques for intelligence professionals. It incorporates much of the Information Science material of the Functions Course (see paragraph 1, A) but is reduced in scope and depth. Practical exercises are utilized and elementary skills are developed. (Grade range -- GS-09 through 14.)

D. Survey of Intelligence Information Systems  
(Survey Course)

A three-week course for intelligence officers designed to provide an overview of the information handling systems of the various agencies of the Intelligence Community. It surveys the content, services, capabilities, and limitations of these systems. It includes visits to CRS, WPIC, DIA, and NSA. It teaches elementary skills in the use of storage and retrieval and on-line terminals and the application of these skills to intelligence tasks. (Grade range -- GS-09 through 15.)

<u>Course</u>	<u>Number of Enrollments in FY 1974</u>
E. <u>Workshops in Intelligence System Applications</u>	_____
Two or three week special courses designed to meet the unique Information Science training requirements of highly functional areas of application. These can be tailored to meet the such special needs as Indications and Warning, Finance, Current Intelligence, Clandestine Services. (Grade range -- as desired by customer office.)	
F. <u>Any Other Information Science or Management Science Course desired by customer office for non-systems specialist and non-technical personnel. (Describe)</u>	_____

MEMORANDUM FOR: Mr. Robert Wattles, A/DDS

SUBJECT: D/DCI/IC Projects Which May Affect Future  
Training Requirements

1. As a matter of background information in your consideration of future training responsibilities of OTR, I thought you would be interested in the following comments on two projects which are being undertaken in the Product Review Group of the IC staff. Both of these projects relate to the charge in the President's memorandum of 5 November 1971, "Organization and Management of the U.S. Foreign Intelligence Community," that "a determined effort be made to upgrade analysis personnel and analysis methods."

2. The first project is examining the training in analytical methodologies which is being provided intelligence production analysts in CIA, DIA, and INR/State. Annexes to the study already have been prepared on each organization. The text of the study will evaluate the manner in which this training is being applied in the production process and will comment on expected future requirements. It already is clear, however, that one of the objectives should be the fostering of an improved environment within the production offices for experimentation with new analytical methodologies on live intelligence problems and increased use of computer support to take advantage of what the behavioral sciences and information sciences can offer.

3. The second project, closely related to the training study, involves an examination of ways and means of experimenting with new and better ways of developing intelligence products. The recent decision to authorize establishment of a five-man staff in DDI for this purpose is one of several indications of growing interest in this problem in the intelligence community. Both DIA and INR/State have experimental efforts underway. PRG/IC is working with the DOD Advanced Research Projects Agency to learn what applicable research, of at least potential use to the intelligence community, already has been financed in universities and elsewhere by ARPA. It now seems probable that one recommendation of the study is going to be that the DCI form a community committee to foster exchanges of information on product development among elements of the intelligence production community and to propose specific research projects. 25X1

4. Both of these study efforts are still in their information gathering stages, but I am already convinced that there is a growing realization in the offices involved with production of finished intelligence of the need for adopting advanced analytic methods and that expanded training in analytical methodologies and the information sciences will be necessary. Since all of the organizations face problems which are quite similar in nature, the kinds of training required also are going to be similar. This will increase interest in jointly-sponsored training activities or in training conducted by one organization for the use of all as a matter of common concern. In view of the responsibilities of the DCI in matters of community resource use, there may well be a tendency to look to him for leadership in fostering arrangements which will provide training at the least overall cost.
